Buy an Enermax product and have a chance at being a winner!

Buy any Enermax product from Scan and you are automatically entered into the Lucky Draw to win additional high-performance PC components from Enermax. Make sure you keep your invoice. The purchase date must be between 11th March and 30th April. You can take part only one time with one invoice.

Link to Enermax & Scan lucky draw

Entry deadline for luck draw: 30/04/09

The prize:

1st prize | Free choice of Enermax product

Do you need a new high-performance PSU or a functional and unique PC case? Your high-end PC system longs for cooling or your HDD for a stylish enclosure? Take an Enermax product of your choice.

2nd prize | PC case Enermax PhoenixNeo

Energetic curved aluminium brushed front and red or blue illuminated ventilation shafts are a real credit to the mythical firebird, which gave its name to Enermax PhoenixNeo. The user-orientated design is another advantage: screwless quick release for expansion cards, removable front panel and easy cleanable micro dust filter - that way do-it-yourself PC building is really fun.

3rd prize | Keyboard Enermax Aurora Premium

The brushed Aluminium design gives Aurora Premium USB keyboard a unique and noble look. No surprise, that Aurora gained the "red dot design award 2007". The "Scissors" key switch technology affords a quiet and flexible key stroke during work. You might know that feeling from notebook keyboards.

4th prize | 2 x 12cm cooling fan Enermax Cluster

The white cooling fan series Cluster is designed for the PWM usage of your mainboard. Rotation speed could be adjusted and varied between 500 and 1200 RPM. The patented Twister Bearing Technology allows an almost frictionless operation, suspended by magnetic force. This will effectively reduce noise and enhance the life expectancy up to 100,000 hours.

5th prize | 2 x 12cm cooling fan Enermax Everest

Everest series provides temperature-sensitive control of rotation speed. It achieves between 500 RPM at a temperature of about 25°C and 1000 RPM at 45°C. The patented Twister Bearing Technology allows an almost frictionless operation, suspended by magnetic force. This will effectively reduce noise and enhance the life expectancy up to 100,000 hours.

GOOD LUCK!
