

## PRESS INVITATION

### Enermax @ Computex 2010

**Hamburg, 19th of May 2010.** Since 20 years, the Enermax brand stands for high quality, outstanding performance and smart innovations. By the beginning of the anniversary year 2010, Enermax has launched its new PSU generation: The **Modu87+** and **Pro87+** PSU series set new standards in terms of efficiency, performance and silent cooling – approved by many independent tests worldwide.

#### Premiere of High-end Enermax PSU

In view of forthcoming high-performance graphics cards, the demand for powerful and at the same time efficient PSU is still growing. For that reason, Enermax decided to extend the 80PLUS® Gold certified Modu87+ series up to 900W. On Computex, visitors will have the chance to take a first look on the powder coated versions of Modu87+ with 800W and 900W.

Furthermore, the Revolution85+ PSU series would have two more new models with 920W and 1020W, which will be available in the late third quarter. Enermax managed to create one of the most compact high-end PSU with 175mm depth. It accommodates four powerful 12V rails and a high-efficient state-of-the-art DC-to-DC topology. New Revolution85+ will be compatible with smaller chassis and affordable for a larger number of users.

#### Hot Cases, Silent Cooling

Also in other segments Enermax will show several ambitious products, which are about to be launched in short: Gamers will be enthusiastic about Volcanus, the new gaming case with its hot flame design and advanced cooling system accommodating up to five fans. Therefore, Midi Tower Luxuray is directed to design devotees. The high-glossy acrylic front and black-coated interior gives it a unique and elegant appearance, completed by the bright colours and outstanding light effects of integrated three-colour Apollish front fan. The LED light can be switched among blue, red and green colour – according to user's own taste.

Enermax brings further good news for those, who are searching for simple, effective and quiet case fans: New T.B.Silence fan series is – like all Enermax Twister fans – based on patented, long-lasting and smooth Twister Bearing providing optimal performance and noiseless cooling. Completing the high-quality office and design product lines, Enermax will also show some new peripherals like HDD enclosures, keyboards and notebook cooling pads.

**More details about all new Enermax products, you will come to know at Computex in Taipei. We are looking forward to meeting you:**

**Enermax @ Computex 2010**  
**1st – 5th of June 2010**  
Nangang Hall, booth I 818
